Product Description

Simple and efficient single-bale feeding.

The Truline Roll Handler provides a practical and efficient solution for feeding out one bale at a time. Designed to attach easily to your tractor, it simplifies daily hay feeding operations, saving valuable time and labour.

Proudly Australian-made.

Designed and manufactured in Australia, the Truline Roll Handler is built to meet the demands of Australian farmers.

Manufactured with quality and durability in mind, the Roll Handler is designed to withstand challenging Australian farming and weather conditions.

Each attachment is sandblasted, zinc-primed and powder-coated to provide a durable, high-quality finish. Its user-friendly design makes everyday feeding operations quick and straightforward.

Key Features

- Designed and manufactured in Australia.
- Zinc-primed and powder-coated finish.
- Choice of hitch configuration.
