Product Description

Simple and efficient single-bale feeding.

The Truline Roll Handler provides a practical and efficient solution for feeding out one bale at a time. Designed to attach easily to your tractor, it simplifies daily hay feeding operations, saving valuable time and labour.

Proudly Australian-made.

Designed and manufactured in Australia, the Truline Roll Handler is built to meet the demands of Australian farmers.

Manufactured with quality and durability in mind, the Roll Handler is designed to withstand challenging Australian farming and weather conditions.

Each attachment is sandblasted, zinc-primed and powder-coated to provide a durable, high-quality finish. Its user-friendly design makes everyday feeding operations quick and straightforward.

Key Features

- Designed and manufactured in Australia.
- Zinc-primed and powder-coated finish.
- Choice of hitch configuration.

Price:

Stock: instock

Categories: All Equipment, Truline Machinery

Tags: bale feeder, hay, hay feeder, round bale feeder, side loader, silage, Truline, Ultimate 4R, ultimate R6

Product Description

Enhanced usability to save you time and money.

The Truline Machinery Ultimate 4R Side Loader Bale Feeder is designed to streamline daily feeding operations, reducing both labour and operating costs.

Featuring a front-mounted side loader and the capacity to carry up to four round hay or silage bales, the Ultimate 4R allows farmers to load and distribute feed quickly and efficiently.

Designed with practicality in mind, its bolt-on components allow for straightforward maintenance and easy replacement of parts, helping to minimise downtime.

Proudly Australian-made.

Designed and manufactured in Australia, the Ultimate 4R is built to meet the demands of Australian farmers.

Engineered for durability and reliability, the Ultimate 4R is manufactured to withstand challenging Australian farming and weather conditions.

Each machine is sandblasted and powder-coated to provide a durable, high-quality finish. Its user-friendly design simplifies loading and unloading, helping farmers achieve more efficient feeding routines while saving valuable time and labour.

Key Features

- Front-mounted side loader for efficient bale handling.
- Capacity to carry up to four round hay or silage bales.
- User-friendly loading and unloading system.
- Bolt-on components for easy maintenance and replacement.
- Heavy-duty construction for Australian farming conditions.
- Sandblasted and powder-coated for a durable finish.
- Designed and manufactured in Australia.

- Reduced feeding time and labour requirements.

SKU:

Price:

Stock: instock

Categories: All Equipment, Truline Machinery

Product Description

Saving you time and effort.

The Truline Machinery Mud Scraper is designed to simplify the maintenance of farm tracks and yards, providing an efficient solution for clearing mud and improving livestock access.

Easily attached to your choice of machinery, the Mud Scraper helps maintain cleaner and safer surfaces, allowing cattle to move more easily while reducing wear on farm equipment.

Its robust construction and straightforward operation make it a practical and reliable attachment for everyday farming operations, saving valuable time and labour.

Proudly Australian-made.

Designed and manufactured in Australia, the Truline Mud Scraper is built to meet the demands of Australian farmers.

Manufactured using heavy-duty steel, the Mud Scraper is engineered for strength, durability and reliability in challenging Australian farming and weather conditions.

Each attachment is sandblasted, zinc-primed and powder-coated to provide a durable, high-quality finish. Its user-friendly design and replaceable reinforced rubber make operation and maintenance straightforward.

Key Features

- Designed and manufactured in Australia.

- Sandblasted, zinc-primed and powder-coated finish.
- Heavy-duty 10mm thick steel construction.
- 67mm rectangular hollow section (RHS).
- 3-metre working width.
- Replaceable reinforced rubber.
- Choice of preferred hitch.
- Custom designs available on request.

Tags: hay, hay feeder, Truline, ultimate R6

Product Description

Enhanced usability to save you time and money.

The Truline Machinery Ultimate 6R Side Loader Bale Feeder is designed to streamline daily feeding operations, reducing both labour and operating costs.

Featuring an extendable front-mounted side loader and the capacity to carry up to six large round hay or silage bales, the Ultimate 6R allows farmers to transport and distribute feed quickly and efficiently.

With both side and rear loading capabilities, the Ultimate 6R offers flexibility across a range of farming operations. Its bolt-on components allow for straightforward maintenance and easy replacement of parts, helping to minimise downtime.

Proudly Australian-made.

Designed and manufactured in Australia, the Ultimate 6R is built to meet the demands of Australian farmers.

Engineered for durability and reliability, the Ultimate 6R is manufactured to withstand challenging Australian farming and weather conditions.

Each machine is sandblasted, zinc-primed and powder-coated to provide a durable, high-quality finish. Its user-friendly design simplifies loading and unloading, helping farmers achieve more efficient feeding routines while saving valuable time and labour.

Key Features

- Designed and manufactured in Australia.
- Extendable front-mounted side loader.
- Multi-purpose design for transporting and feeding out hay.
- Capacity to carry six large round hay or silage bales.
- Side loading for improved visibility, or rear loading.
- Suitable for tube-wrapped silage.
- Removable backstop.
- Five easy-empty drop-down bins for net wrap.
- Tow chain attachment points for added safety.
- Adjustable swivel hitch.
- Zinc-plated floor chains.
- Only three hydraulic remotes required.
- Reversible floor with forward and reverse operation.
- LED tail lights.
- Flotation tyres.
- Remote grease lines on axis pivots.
- Sandblasted, zinc-primed and powder-coated finish.

Twin Round Bale Feeder

Read More

SKU:

Price:

Stock: instock

Categories: Truline Machinery, Uncategorised

Tags: bale, bale feeder, hay, hay feeder, round, silage, square

Product Description

Maximise efficiency and minimise waste.

The Truline Machinery Twin Bale Feeder is designed to improve everyday feeding operations, with the capacity to carry two round bales of hay, silage, baleage or straw and distribute feed from either side of the machine.

Its innovative feeding system minimises waste and maximises feed availability by distributing feed evenly in fluffy windrows, one layer at a time.

Combining versatility, reliability and ease of operation, the Twin Bale Feeder provides an efficient feeding solution that helps farmers reduce labour and save valuable time.

Proudly Australian-made.

Designed and manufactured in Australia, the Twin Bale Feeder is built to meet the demands of Australian farmers.

Constructed using high-quality Australian materials, the Twin Bale Feeder is engineered for strength, durability and long-term reliability in challenging Australian farming conditions.

Its zinc-primed and powder-coated finish provides additional protection, while its user-friendly design simplifies loading, unloading and routine maintenance, ensuring efficient daily feeding operations.

Key Features

- Designed and manufactured in Australia.
- Zinc-primed and powder-coated finish.
- Feeds out from both sides of the machine.
- Adjustable tow hitch.
- Simple positive loading system with minimal moving parts.
- Replaceable bolt-in axle.
- Heavy-gauge steel construction.

- Easily accessible grease points.
- Deep chamber for a low centre of gravity.
- Robust duplex coupling drive.
- Accommodates hay and silage bales up to 6ft x 5ft.

Optional Extras

- Twin waste bins.
- Flotation wheels.
- Wide axle kits.
- Bale safety hoops.
- Tall lights.

Specifications

Length
4.5 Metres

Width
2.4 Metres

T-Rex Square Bale Feeder

Read More

SKU:

Price:

Stock: instock

Categories: All Equipment, Truline Machinery

Tags: bale feeder, hay, round, silage, square

Product Description

Efficient, durable and reliable.

The Truline Machinery T-Rex Bale Feeder is specifically designed for feeding square bales, while also offering the versatility to handle round bales of any size. Suitable for both feed pads and paddocks, it provides an efficient feeding solution for cattle, horses and other livestock.

Designed to minimise feed waste and maximise feed availability, the T-Rex distributes hay evenly, feeding out in fluffy windrows or one biscuit at a time.

Its simple and robust design ensures straightforward operation, helping farmers reduce feeding time and labour while improving everyday productivity.

Proudly Australian-made.

Designed and manufactured in Australia, the T-Rex Bale Feeder is built to meet the demands of Australian farmers.

Constructed from high-quality 6mm thick rectangular hollow section (RHS) steel, the T-Rex is engineered for strength, durability and long-term reliability in challenging Australian farming conditions.

Its zinc-primed and powder-coated finish provides additional protection, while its user-friendly design simplifies loading, unloading and routine maintenance.

Key Features

- Designed and manufactured in Australia.
- Feeds both round and square bales of any size.

- Zinc-primed and powder-coated finish.
- Ability to feed over fences.
- Adjustable tow hitch.
- Simple positive loading system with minimal moving parts.
- Replaceable bolt-in axle.
- Extra-wide axle for improved stability.
- Heavy-gauge steel construction.
- Easily accessible grease points.
- Low centre of gravity.
- Robust duplex coupling drive.
- Twin waste bins.
- Optional swivel hitch.
- Flotation or standard wheel options.

Optional Extras

- Feed pad tray.
- Rear backing plate.
- Flotation wheels.
- Swivel hitch.
