### Product Description

A Supreme Feed Processor helps you provide nutritious rations for your cattle by improved mix quality through superior tub and auger design. Along with great ROI from your feedstuffs, a Supreme Feed Processor provides a great investment as it holds high resale value. You enjoy the reliability you need from a well-built machine made with quality components. The 600 Pull-Type has a maximum payload of 14,000 lbs (6,350 kg), struck capacity of 465 ft<sup>3</sup> (13.2 m<sup>3</sup>) or 534 ft<sup>3</sup> (15.1 m<sup>3</sup>) with tub extension, and requires 100 horsepower (75 kW). Unlike most other vertical mixers that use smaller single stage planetary drives, Supreme uses the heaviest two-stage planetary drive available. Combined with a heavy duty gearbox, this robust system rotates the auger through the toughest of materials. This simple design features few moving parts with no chains, sprockets or countershafts to worry about. Each Supreme pull type is built to order with a large variety of options available, ensuring each customer gets a unit that is designed to meet their specific needs. The 600 is also available as a stationary mixer. [Download Information](#)
