### Product Description

A Supreme Feed Processor helps you provide nutritious rations for your cattle by improved mix quality through superior tub and auger design. Along with great ROI from your feedstuffs, a Supreme Feed Processor provides a great investment as it holds high resale value. You enjoy the reliability you need from a well-built machine made with quality components. The 500T Pull-Type has a maximum payload of 14,000 lbs (6,350 kg), struck capacity of 479 ft<sup>3</sup> (13.6 m<sup>3</sup>) or 555 ft<sup>3</sup> (15.7 m<sup>3</sup>) with tub extension, and requires 80 horse power (60 kW). Unlike most other vertical mixers that use smaller single stage planetary drives, Supreme uses the heaviest two-stage planetary drive available. Combined with a heavy duty gearbox, this robust system rotates the auger through the toughest of materials. This simple design features few moving parts with no chains, sprockets or countershafts to worry about. Each Supreme pull type is built to order with a large variety of options available, ensuring each customer gets a unit that is designed to meet their specific

needs. [Download Information](#)
