Product Description

The Byron AG Sheep Confinement Feed Troughs are:

- Made here in WA with heavy galvanized steel frames and UV stabilised polyethylene liners to last in Australia's harsh conditions.
- Adjustable! Head space height can adjust to suit feeding lambs, ewes or rams on the same system.
- Designed as a kit to allow fast and easy install on site, while cutting out the costs of freight
- Can be installed in any length you require! Lengths can be added or divided on at any stage
